Subject: Re: Basewide Rad Work Plan

Hi Steve and James,

I am puzzled by this document. Although it is titled "Basewide Radiological Workplan" it is generic and it does not describe any work to be performed at HPS.

Steve, have you seen anything like this before? Would the Navy be giving us site-specific workplans at some point? Note that work is supposed to already have started.

Karla, you should consider James the EPA RPM contact on this document.

Thanks.

Subject: Basewide Rad Work Plan

Hi Michael and James,

I received a copy of the Basewide Radiological Work Plan (Thanks Michael for asking the Navy to send me one). Should we do anything with this other than use it for reference? The Navy's cover letter seems to indicate that they are not expecting comments and states that work under this plan began around March 1.

Karla
